

**To:** Airlines and Tenants

**From:** Byron Burkhart, Sr. Manager Airside Operations and Safety

**Subject:** New Distribution Method for NOTAMS

**Date:** June 5, 2015

Effective the week of June 1, 2015, airport condition reports, more commonly known as Notice to Airmen (NOTAM), has commenced delivery electronically through the FAA Digital NOTAM System.

In addition to the current local NOTAM delivery method, airport tenants will begin to receive individual email notifications.

Upon approval for change from the FAA Southern Region Office, all airport condition reporting will be permanently distributed by email only to airport tenants. After approval the current local NOTAM distribution notices will be discontinued except in the event of a Digital NOTAM System failure.
