**Subject:** Traffic Changes to Garage Flow and Terminal Drive

**Date:** March 5, 2018

## Effective Immediately

### ENABLING PROJECTS FOR THE CONSOLIDATED RENTAL CAR (CONRAC) FACILITY CONSTRUCTION

The *Airport Exit* connected to the entrance of the parking garages is closed in support of the CONRAC program (see red path). Safety signage and lane restriction notifications are placed accordingly. Customers on this path are able to use the garage access and ten minute grace period as a means of egress.

KCAB's contractor is starting work on a temporary exit for the Parking Garage. Traffic on Terminal Drive will be reduced to one lane during this phase of construction (see red arrows below). The temporary exit is anticipated to be in use by the week of 3/5/2018 - weather dependent. Work is expected to be complete in June 2018.

These elements are in addition to the restriction to the Terminal 1 garage and access point created for the hotel that area already in place. Parkers in the Terminal 1 garage will exit at a new location as denoted on the attached drawing (see green path). Parkers using the Terminal 1 garage have been notified that this option will be closed effective May 1 and will no longer be open for parking.
