

Operations Memorandum

To: CVG Airlines and Applicable Agencies

From: Brian Cobb, VP - Customer Services

Subject: FOD Control at Terminal 2 Triturator Site

Date: March 31, 2015

KCAB, its partner airlines and ramp support agencies are responsible for strict compliance to FOD control. As such, all trash removal, containment, and placement within approved dumpsters must be followed. An unapproved waste container has been removed from the Terminal 2 triturator site due to the FOD hazards it presents. All airline and ramp support agencies are reminded to dispose of trash items at appropriate dumpster locations prior to servicing lavatory units. Dumping of trash other than lavatory waste in and/or around the Triturator is strictly prohibited.

Thank you for addressing this aviation concern.
