CVG Operations Memorandum

To: **Airlines and Authorized Tenants**

From: **Brian Cobb, VP - Customer Services**

Subject: **Concourse A Gate Doors Exit Button Addition**

Date: **June 19, 2015**

All gate doors inside of Concourse A are being equipped with red exit buttons for use when exiting the loading bridge. These new buttons are replacing the automatic door sensors that were previously in place. The KCAB Facilities Maintenance team is currently installing the new devices and will have all exit buttons installed within the next week. Please use the red exit button adjacent to the door when exiting the loading bridge; proper use will prevent false door alarms and unnecessary Airport Police responses. The pictures below show the design, warning placard and approximate location of the newly installed exit buttons.
