Operations Memorandum

To: CVG Airport Airlines

From: Brian Cobb, Director - Customer Services

Subject: Pre Conditioned (PC) Air Hose Swivel Assemblies

Date: March 12, 2013

New swivel assemblies (couplers) have been installed on pre conditioned (PC) air hoses at Concourse A. The new coupler, identified in the picture below, allows the hose to swivel, untwisting itself, when used. Like the hose connector, the assembly is made of hard, rigid plastic. Care must be taken when positioning the hose and returning it back to its cradle after use.

Never drop, throw or drag the coupler or hose connector on the ground, as severe damage may occur.
