Subject: FOD Program

Date: 02/12/2024

Effective Immediately

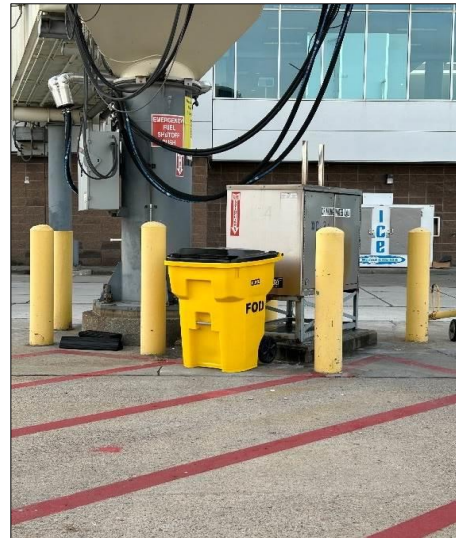

The Airport Operations and Maintenance Teams have been working on initiatives related to our airport FOD program. One initiative is the addition of FOD cans around the concourses to supplement the dumpsters that are currently in place. The A Concourse cans are located along the sidewalk of the building while the B Concourse cans are located at the jet bridge pedestal. Continued use of FOD buckets the on-jet bridges is acceptable, please ensure they are emptied on a regular basis. The can location and placement will be evaluated over the coming months.

Please refer to current can locations below and distribute to your staff.

Note that this placement is subject to change, as additional cans have been requested.

See can reference below:

These cans are to be used for FOD only, and all aircraft related trash should still be taken to the closest dumpster. All trash receptacles located around the concourses that are not in leaseholds will be removed over the coming weeks. Please ensure that those remaining are emptied on a regular basis to prevent FOD hazards on the ramp.

For any additional questions or concerns, reach out to Casey Kinosz at ckinosz@cvgairport.com or 859-620-3166.
