

Cincinnati/Northern Kentucky International Airport

Operations Memorandum

To: CVG Airport Airlines

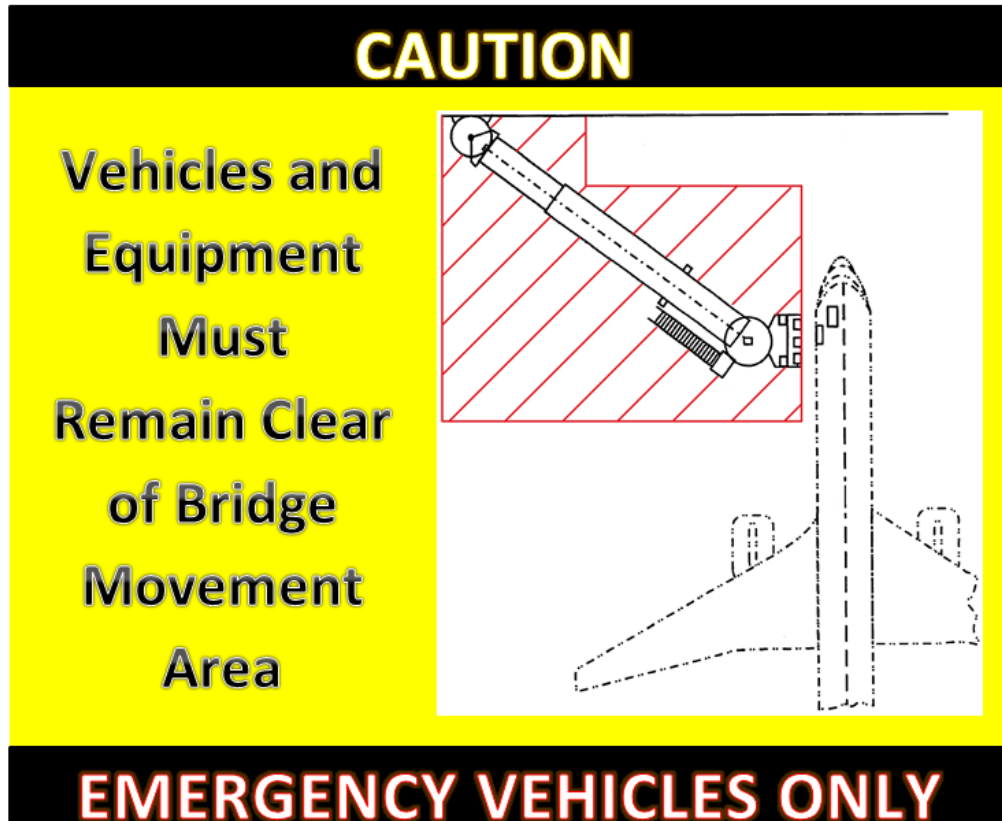

From: Brian Cobb, Director - Customer Services

Subject: **Concourse A Passenger Loading Bridge Safety Awareness**

Date: January 10, 2013

Part I

KCAB will be installing the following signage on/around each Concourse A passenger loading bridge as a visual alert. For safety purposes, all personnel must ensure that vehicle and equipment remain clear of the bridge movement area. This includes keeping parked vehicles away from the bridge and restricting any driving under/near the bridge to emergency vehicles only.

Part II

The following notification and operational decision protocols will be taken should it become necessary for KCAB remove a Concourse A passenger loading bridge from service. The flow allows for KCAB and Airlines to consider available maintenance timing and alternate bridge plans in the event operations will be negatively impacted..

Note: Failure of the PCAir, Ground Power, and/or Potable Water units will not result in a bridge being removed from service, under most circumstances.
