Subject: Parking Garage Guidance System Project and Maintenance

Date: 02/23/2024

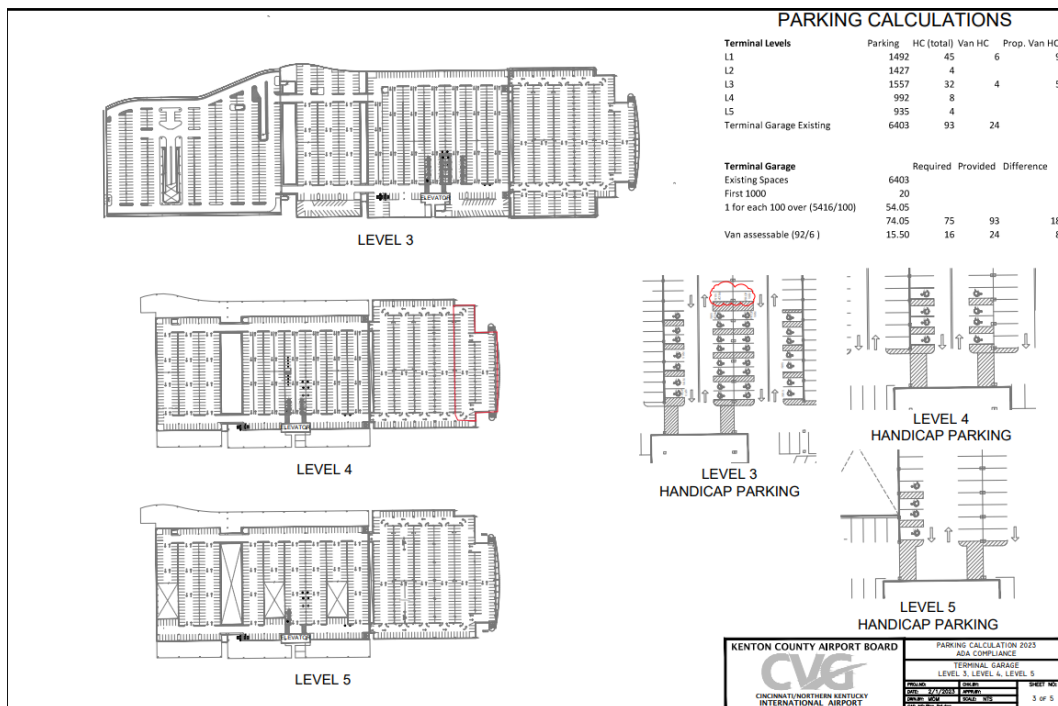

Effective Monday February 26th, 2024

On Monday February 26th, 2024, Glenwood Electric will begin the first phase of many in support of the Parking Garage Guidance System Project. Scope of work includes sensor, fiber, and conduit installation. Simultaneously within the same closure area, SP Plus will be performing general maintenance throughout the garage, including pressure washing and restriping. All area closure signage will be put into place 16 days prior to the scheduled start of each phase.

The first testing phase will commence on Monday February 26th, 2024, on the fourth level of the Main Terminal Parking Garage, closing a total count of 103 parking spaces. The project in its entirety is tentatively set to conclude on Monday September 30th, 2024.

Please note that the specific phasing schedule providing closure duration and area is to follow.

Please see the first [testing] phase closure area below and distribute to your staff:

For any additional questions or concerns regarding this project, reach out to That Fogle at tfogle@cvgairport.com or 859-743-5978.
